MD Dredge Pump

The Warman MD is a new product offering designed specifically to meet the demands/rigors of contractor and aggregate dredging.

Employing the latest Computational Fluid Dynamics design techniques the Warman MD pump will provide superior resistance to wear, increased efficiencies, increased ease of maintenance and enhance the overall production of your operation.

Warman MD 12x10
dredge pump

Warman MD dredge pump features

- Large diameter, slow turning, high efficiency impellers offer maximum wear life, lower operating costs and reduce the need for in line boosters
- Oversized internal passages provide enhanced sphere clearance resulting in increased production and reduced down time
- Left and right hand rotation available to simplify set up and operation with diesel engines
- Solid chrome iron or alternate resistant metallurgy to best suit application enabling long wear and ease of maintenance
- Heavy duty low profile mechanical ends conserve space and weight to assure easy integration of pump into ladders and confined hulls
- Compact cartridge-style oil lubricated bearing assemblies (grease available) offer reduced shaft/impeller overhang to increase bearing lives and minimize shaft deflection resulting in increased packing life
- Anti-vibration nuts used to secure bearing assemblies to pump base
- Unique, easily centered stuffing box reduces gland sealing maintenance and extends packing life
- Quick release clamping collar design facilitates impeller removal
- Top mounted adjusting screw for easy impeller adjustment
- Integrated gland seal guard minimizing risk from rotating elements
- Non-shimming design of underwater bearing housing seals reduces set up time and increases reliability

Underwater bearing housing
seal with speed capability to
1000 rpm

Underwater cartridge-style bearing assemblies

Both in-hull, grease lubricated and oil filled, underwater cartridge-style bearing assemblies available for all pump sizes.

Size range (discharge): 6" to 16" (150 mm to 400 mm)

Capacities to: 20,000 gpm (4545 m³/hr)

Heads to: 275 ft (84 m)

Pressures to: 150 psi (10 bar)

Warman MD Dredge Pump Quick Selection Chart

Adjustable stuffing box

Adjustable stuffing box allows for centering of the stuffing box and lantern restrictor to the shaft sleeve.

Self centering stuffing box/shaft sealing details with adjustment tool shown
